

World First! e+ Virus absorption block HEPA filter incorporated
 e+air (earth-plus air) industrial/office air cleaner for overseas market

Avian Flu Pandemic! Industrial/Office Air Cleaner

Invisible enemy! Avian Flu Pandemic

New types of Influenzas which originate from bird species can cause havoc since most humans do not have immunity to them. Though it was said that these viruses could not be directly transmitted from bird to human, recent cases show that they do, especially the virus called H5N1.

Preventative measures are the key!

Effective vaccine can be made only after the pandemic starts (it takes 6 to 12 months to develop).

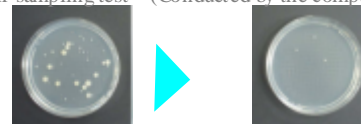

The only way to protect yourselves is to wear an appropriate face mask and use an indoor air cleaner.

Rated specification and range of use may change without prior announcement. The color of the products may be slightly different from the photograph.

Indoor airborne microbial test (Air Sampler Method)

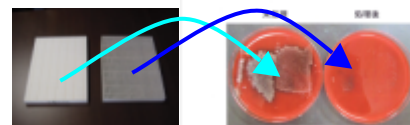

Air sampling test (Conducted by the company)

Pre-purification Post-purification sample

Clinical test (Film adhesion method)

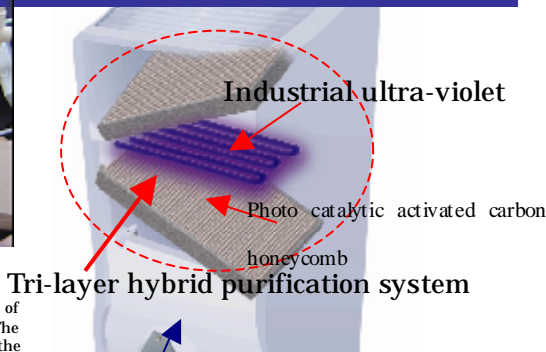

In a hospital terminal care center in Kyushu
 Testing method: Using sample taken from the center of HEPA filter and cultured in agar medium

Left (standard HEPA) Right (e+ HEPA)

Single-Pass Test

For bio-aerosol removal efficiency

Tri-layer hybrid purification system

Single-Pass Test

Single-Pass Test is the strict method of testing bio-aerosol removal efficiency. The microbes sample are sprayed from the intake side of the air cleaner and the counting of the microbes is conducted at the outlet side to determine the cleaner's purification efficiency.

Virus absorption block with e+ HEPA filter

1. Tri-layer hybrid purification system
 UV germicide + Photo catalytic honeycomb

2. Kills germs with a single pass

3. Effective for Avian flu viruses with scientific evidence.
 Virus absorption block with e+ HEPA filter

Specification

Products name: e+ air (earth plus air)
 Model No : SA-709GS0
 Dimension : W301×L284×H707mm
 Weight : approx.10kg
 Power : 220-240V (available in 110V)
 Covering floor space : 41 m² (JEM standard)
 Germicide & deodorize: UV lamp & Photo catalytic activated carbon honeycomb.
 Anti-virus: e+ Virus absorption block with HEPA filter
 Price : open
